

Endura® | 505ALB

Aluminized gloves for long sessions of stick welding

ABOUT THE PRODUCT

Featuring a back-of-hand aluminized layer, our Endura® 505ALB gloves protect against radiant heat, ultraviolet light, molten metal, sparks, and splash.

Gloves allow hands to stay at comfortable temperatures during extended periods of stick welding or for work in foundries.

APPLICATIONS

STICK WELDING, METAL FABRICATION, METAL FOUNDRY & REFINERY, STEEL FABRICATION & REFINERY, METAL FORGING
